

These cast stone trophies are not to be confused with resin trophies. They are made from stone particles and have a look and feel of real stone. In addition, we have combined glass and acrylic with the stone which gives you additional options of laser engraving the acrylic, as well as laser engraving the stone or plate. When you engrave the stone the logos and text turn a dark brown with no color fill. For our medallion selection please refer to pages 27-31, and for engraving information refer to pages 57-58.
